

# MAXIMISE YOUR OPTIONS WITH KORNICHE SYSTEMS

Delivering choice...

The Korniche Lantern gives you a range of personalised options to best enhance your living space.

The patented die cast aluminium bosses make up the cornerstones of the Korniche Roof Lantern, and this innovation allows the roof to be configured in differing styles with spans of up to 6 meters by 4 meters. These robust jointing points create one of the strongest and stiffest lantern available with a minimal requirement for additional strengthening rafters or unsightly tie bars. Less rafters means more glass, more glass means less roof structure for a given area, maximising the light into your home.

The Korniche lantern comes in 3 stock colours of gloss white, matt grey and matt black and these can be chosen in any dual colour combination, for example - a black exterior and white interior, at absolutely no extra cost.
